WAT

Meeting records  Transcript

Summary

Platform layout redesign and navigation updates with merchant spotlight implementation.

Landing Page Structure Update

Platform layout reviewed with side panel reduction. Homepage converted to About Us page.

Navigation Menu Rebranding

Horizontal mega menu adopted across all pages. Platform transitioning to local identity.

Product Page Enhancements

Multi image support added with color palette selector. User reward tokens implemented for reviews.

Decisions

Aligned

- **Redesigning Homepage and Menu Structure** The group agreed to redesign the homepage structure by changing the landing page to serve as the shop, converting the current home structure into the about us page, and implementing a horizontal menu with a mega menu structure across all pages.

- **Adopting Nigerian-Centric Branding** The platform's reference will shift towards 'made in Nigeria' or 'Buy Nigeria' branding, moving away from the 'AB' name.
- **Adding Merchant and Product Spotlights** The shop interface will include a merchant spotlight section and a product spotlight section to highlight top-performing merchants and promoted products.
- **Enhancing Product Page Features** Product pages will incorporate multiple image displays such as carousels or thumbnails, color palette options, and a related items section.
- **Implementing User Token Earning** The user system will implement a token or point-earning mechanism where users can earn points for activities like product reviews.

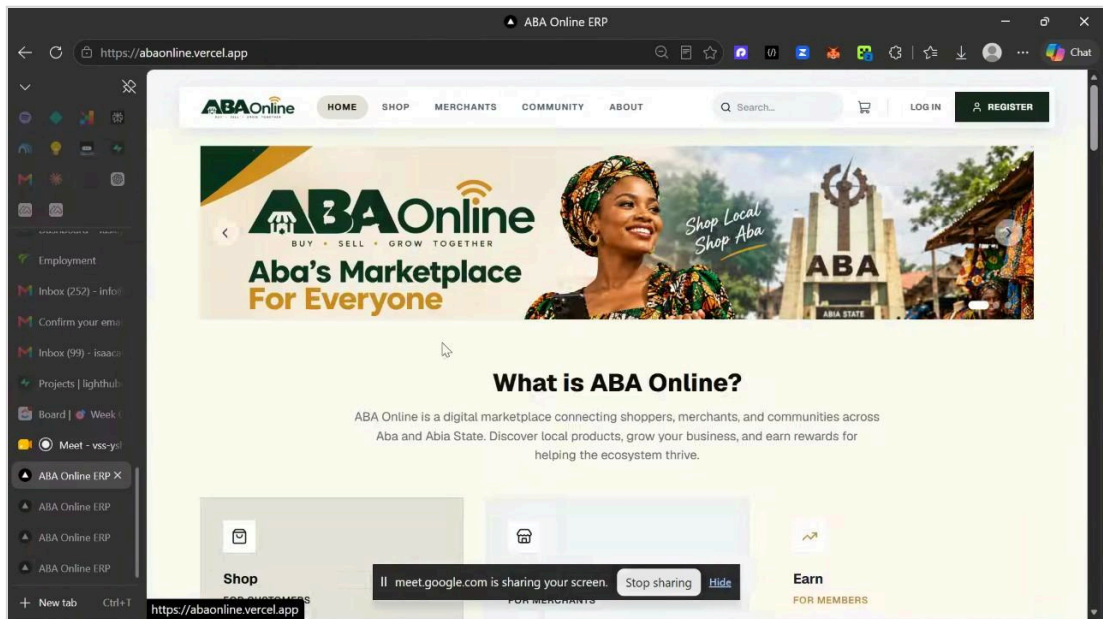

Next steps

- ☐ [David Enabs] Update Landing Page: Change the landing page from home to shop and repurpose the current homepage as an About Us page.
- ☐ [David Enabs] Relocate Hero Section: Move the hero section from the original homepage to the shop page.
- ☐ [David Enabs] Implement Mega Menu: Implement a horizontal mega menu structure across all pages that supports sub-categories.
- ☐ [David Enabs] Rebrand Project: Remove all current references to the project name and update branding to align with a made in Nigeria theme.
- ☐ [David Enabs] Add Spotlight Sections: Develop merchant and product spotlight sections on the homepage to highlight top-performing vendors and specific items.
- ☐ [David Enabs] Add Category Filtering: Enable sub-category filtering on shop and merchant pages to improve item navigation for users.
- ☐ [David Enabs] Implement Share Features: Add social sharing buttons to merchant and store profiles to support WhatsApp, direct link copying, and social media platforms.
- ☐ [David Enabs] Add Store Sub-menu: Integrate a sub-menu within individual merchant stores to allow users to filter items by specific categories.

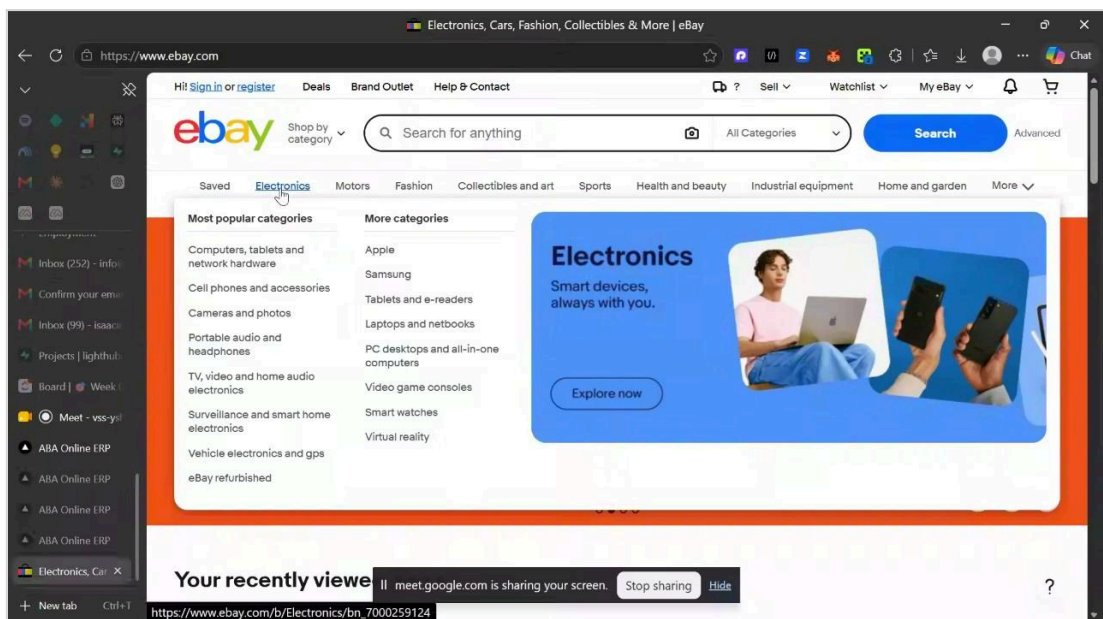

- ☐ [David Enabs] Enhance Review System: Implement an effective review system based on shared reference examples.
- ☐ [David Enabs] Design Referral Hierarchy: Design visual imagery for user profiles to show referral network relationships including upline and downline performance metrics.
- ☐ [David Enabs] Update Product Page: Incorporate image carousels and thumbnails on product pages to enhance the viewing experience.
- ☐ [David Enabs] Enable Color Selection: Provide a color palette option on product pages allowing users to view different color variations for items.
- ☐ [David Enabs] Add Related Items: Display a related items section on product pages to encourage further customer exploration.
- ☐ [David Enabs] Implement Token System: Develop a system for users to earn tokens for various activities such as submitting product reviews.

Details

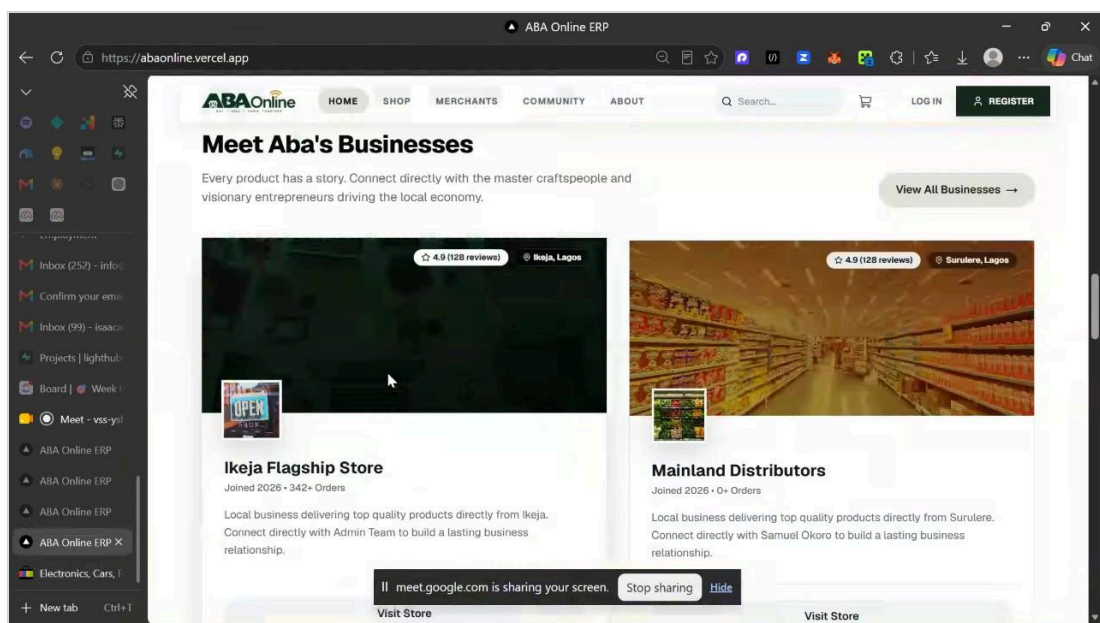

- **Landing Page and Hero Section Structure:** Roundstone Information reviewed the platform layout and noted that the side panel size needs reduction ([00:01:12](#)). Roundstone Information stated that the current home page should be converted into the "About Us" page, while the main landing page should be designated as the shop ([00:08:17](#)). Furthermore, Roundstone Information instructed David Enabs to move the hero section from the homepage to the top of the shop side, incorporating two top slivers for a circular search feature, "sell", and "earn" options with brief explanatory text ([00:09:48](#)). David Enabs acknowledged these layout updates ([00:08:17](#)).

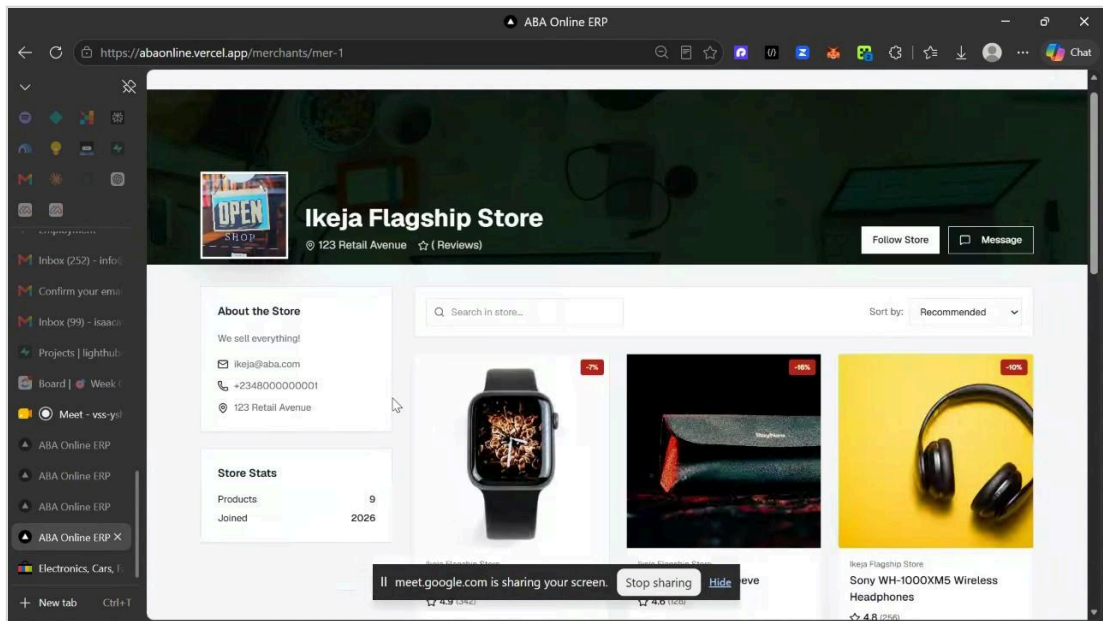

- Navigation Menu and Platform Rebranding:** Roundstone Information explained the need to shift from a rigid vertical menu structure to a horizontal menu utilizing a mega menu approach across all pages, allowing for flexible subcategories such as men's fashion, women's fashion, children's fashion, accessories, and household items. Roundstone Information noted that this mega menu will also enable the platform to spotlight specific star vendors within particular categories (00:11:26) (00:14:34). Additionally, Roundstone Information discussed moving away from the "AB" name toward a "made in Nigeria" local identity, referencing potential names like "Buy Nigeria". David Enabs participated in the discussion and confirmed whether the menu should appear across all pages (00:16:57).

- **Merchant and Product Spotlights:** Roundstone Information proposed implementing a "Merchant Spotlight" section similar to eBay to highlight top-performing merchants whom users can hover over and buy from directly, alongside a backend system to periodically refresh the featured vendors. Additionally, Roundstone Information suggested adding a separate "Product Spotlight" section for merchants who pay extra to promote specific products (00:18:51). Regarding the "Meet businesses" section, Roundstone Information instructed David Enabs to reduce the card sizes to display four items per page instead of two, and to potentially implement a carousel with a link directing users to a comprehensive list of all businesses (00:20:25). David Enabs acknowledged the directives (00:18:51).

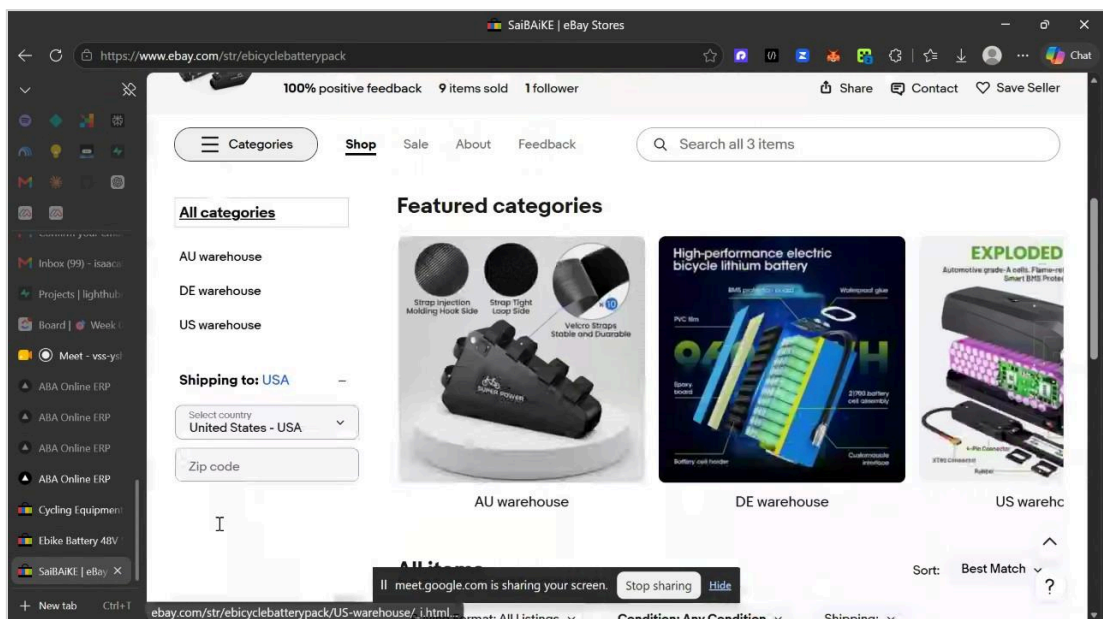

- **Store Page Navigation and Sharing Capabilities:** Roundstone Information addressed the merchant stage and store pages, emphasizing that categories like men's fashion must include granular sub-subcategories (such as transitioning directly to shoes) so users do not have to search manually (00:21:56). To enhance promotion, Roundstone Information requested that David Enabs implement sharing functionality on merchant profiles, enabling users to share store links directly to WhatsApp, Facebook, LinkedIn, or via copy link (00:23:38). Furthermore, Roundstone Information noted that individual store pages require a sub-menu and filtering options to sort through a specific merchant's inventory (00:24:40). David Enabs confirmed understanding of these requirements (00:23:38).

- **Store Reviews, Interface Animations, and Vendor Verification:**

Roundstone Information stressed that customer reviews must be high quality and well-implemented, referencing a successful reference example shared previously in a group chat ([00:25:51](#)). Taking inspiration from eBay, Roundstone Information pointed out interface behavior where scrolling automatically collapses categories to display more products. Roundstone Information also suggested displaying marketer referral codes or historical sales data on store pages to help customers vet and verify sellers, and highlighted the value of implementing a "Save Seller" feature along with a product slide-out menu ([00:27:56](#)). David Enabs acknowledged these design recommendations ([00:29:33](#)).

- **Community Section and Marketer Profiles:** David Enabs noted that the community page is currently empty and still being thought through ([00:29:33](#)). Roundstone Information instructed David Enabs to populate the community draft with explanations of hierarchy levels, purchasing advantages, and token earnings. Regarding marketer profiles, Roundstone Information specified that the interface must include visual imagery displaying a marketer's upline and downline relationships, relative performance metrics, and earnings sources, while noting that real names do not necessarily need to be displayed. David Enabs acknowledged these instructions ([00:31:15](#)).
- **Product Page Details and User Token Rewards:** Roundstone Information outlined necessary enhancements for product pages, including multi-image support through a carousel or Amazon-style hover thumbnails, and a color palette selector for items available in multiple colors ([00:32:53](#)). Roundstone Information also recommended adding a "Related Items" section to drive additional user discovery, similar to Amazon ([00:34:33](#)). To encourage engagement, Roundstone Information proposed an implementation where users earn reward tokens or points for actions like submitting product reviews, which can later be redeemed. Finally, Roundstone Information advised adding more color touches to the homepage outside of the logo, while David Enabs confirmed understanding of the feedback and noted the dashboard implementation is generally acceptable ([00:35:49](#)).

You should review Gemini's notes to make sure they're accurate. [Get tips and learn how Gemini takes notes](#)
